

Amine Cure Crosslinking Agents For FKM/HT-ACM/AEM/ECO

GP 210

(HEXAMETHYLENE DIAMINE CARBAMATE)

GP 210 (Masterbatch)

(70% HDMC 30% AEM Binder)

- Most Popular Cross-Linking Activator for FKM/AEM/ACM/HT-ACM/ECO (Tight Cure)
- Significantly Decreases Compression set in FKM/AEM/ACM/HT-ACM/ECO At High Temperature
- Excellent Scorch safety helps Reduce Rejection/Wastage
- Excellent Heat Aging Condition

GP 213

(DICINNAMYLIDENE HEXAMETHYLENE DIAMINE)

- Curing / Crosslinking Agent for FKM, AEM, ACM, ECO etc...
- Safer Curative with Excellent Scorch Safety.
- Gives excellent Tensile Strength at Elevated Temperature
- Produces Compounds with Excellent Tear Strength
